STANISLAV LEVYSHCHEV
Front-end developer

Location: Stuttgart, Germany

E-mail: stas.levyshchev@gmail.com Site: yvelious.github.io Profile: LinkedIn

---

I'm a seasoned **Frontend Developer** with over 10 years of experience creating high-quality, scalable, and user-focused websites and web services. My primary expertise is in **React**, supported by a strong background in modern **JavaScript, HTML5, CSS3**, and responsive design. Throughout my career, I've worked on a diverse range of projects — from startups to enterprise systems — always prioritizing clean code, maintainable architecture, and excellent user experience. One of my strengths is the ability to design and structure UIs independently, without relying on a dedicated designer.

Experience

Front-end Developer   **2015-2022**
PARTS iD Inc. is a company specializing in building marketplaces for automotive parts
www.carid.com

- Collaborated with a cross-functional team to build and deploy user interfaces for e-commerce marketplaces selling automotive parts like carid.com boatid.com, motorcycleid.com, powersportsid.com, camperid.com, recreationid.com, truckid.com toolsid.com
- Developed product catalogs with filtering, search, wishlist functionality, and other user-facing features.
- Implemented modern frontend technologies: React, Redux.
- Optimized page load speed and frontend performance for high-traffic sites.
- Integrated with internal APIs to display up-to-date product and order information.
- Developed internal services to interact with vendor-provided data.
- Built an interactive analytics dashboard visualizing sales and product data with customizable charts and filters.
- Reviewed code and mentored junior developers.

Front-end Developer   **2013-2014**
Smartyads is a global digital advertising software company
www.smartyads.com

- Developed and maintained web services for advertising platforms and dashboards.
- Built interactive interfaces for programmatic advertising.
- Optimized performance and UX for high-traffic dashboards.
- Implemented data visualizations: charts, tables, dynamic filters, and reports.
- Implemented and integrated advertising solutions into websites and web platforms.

Front-end Developer   **2008-2012**
GeeksForLess Inc. is a global IT outsourcing company
www.geeksforless.com

- Developed and coded website templates for clients.
- Built responsive, cross-browser compatible layouts using HTML, CSS, and JavaScript.
- Converted design mockups into functional web pages and interactive UI components.
- Ensured templates were easily customizable and optimized for performance.
- Collaborated with designers and backend developers to deliver high-quality websites.
